# KARAN THAKUR

Game Programmer · Unity (2D & 3D) · Game Design & Mechanics
+91 6230269281 | karan.snrhp@gmail.com | GitHub | Portfolio

## PROFESSIONAL SUMMARY

Game Design and Programming student at Chitkara University with hands-on experience in Unity game development, level design, and 3D asset creation. Skilled in player controllers, physics-based mechanics, and core gameplay implementation. Passionate about building engaging gameplay systems and interactive player experiences using Unity and Blender, with a strong eagerness to grow in the game development industry.

## TECHNICAL SKILLS

**Programming:** C, C++, C#, JavaScript, TypeScript

**Tools / Software:** Blender, Adobe Photoshop, AWS (S3, EC2), React

**Dev Tools:** Git, Visual Studio, Unity New Input System

**Game Engine:** Unity Engine (2D / 3D)

**Gameplay Systems:** Player movement, physics, AI behaviour , level design

**Technical Concepts:** OOP, SWOT Analysis, Basic Unity Scripting

## SOFT SKILLS

Leadership | Team Collaboration | Project Management | Problem Solving | Critical Thinking | Communication

## PROJECTS & EXPERIENCE

**Game Programmer — Academic Projects** *2024 – 2025*

**Boomerang — 3D Obstacle Game**
*3D Obstacle Game · Unity · Physics-Based Gameplay*

**Fangs & Wings — 2D Survival Game**
*2D Dual-Character Survival · Unity · AI Enemy Behaviour*

**Office Wars — Strategy Card Game**
*Card Game Design · Mechanics & Balance · Replayability Focus*

**Hand Gesture Based PPT Controller**
*Gesture Recognition · Computer Vision · Real-Time Input*

## EDUCATION

**Bachelor of Engineering — Computer Science Engineering**
Chitkara University · Game Development Specialization · CGPA: 9.48

## ACHIEVEMENTS

- Developed 3D obstacle game with timing-based physics and river-crossing mechanics
- Implemented enemy AI bat behaviour targeting the fox with real-time combat response
- Built gesture recognition system for real-time PPT control using computer vision
- CGPA 9.48 — Consistently top academic performance at Chitkara University
- Designed dual-character survival system with fox & eagle controlling ground and air
- Designed strategy card game with balanced core rules and replayability mechanics
- Strong OOP architecture with modular, component-based game systems
